

UX Testing + UI Iteration

Each Member of Your Team Will Have the SAME 5 Users (one member from each of the other teams and one non-CS Pathway student) 👉	PUZZLE (Observation Only): <i>As they solve your escape room where are they clicking when they shouldn't? Where are they getting stuck? What seems too hard or too easy? What types of hints were effective/ineffective?</i>	NARRATIVE (Ask Out Loud): <i>How would you describe the story and what is currently happening/happened in this room? What elements of the design (appearance, sound, etc.) could be unified to make this room feel more connected to the other rooms?</i>
User 1 Name: Austin N	- Kept on relicking the wires - Accidentally left the puzzle - GET RID OF THE HOVER TO MOVE - Make pizza box more noticable - Make it so each arrow goes to a different puzzle	- Wants the puzzles to be ordered instead of freeroam - Confused as what to do - Add a map or just make it linear - Add sounds - Useless hallways hard to navigate
User 2 Name: Kai Y	- Left before finishing the puzzle - Add some sound - Didn't see the remove button - Kept relicking	- Confused trying to get around - Change the jumpscare gif - Make the jumpscare faster - More time?
User 3 Name: Djamal B	- Tried to drag the wires instead of clicking them - Wires don't rotate sometimes fix that - A little buggy	- Confused about what to do about the open world - Couldn't find his way around the map
User 4 Name: Zaydan A	- Exited out to the hallway - Tried to drag the wires - Kept relicking the wires	- Got the hint easily - The lights don't lineup if it's not right fix that - The pizza box isn't noticeable - Move the key somewhere else, counter? - Add a tasklist?
User 5 Name: Sebastian C	- Was a little confused about what do at first - Tried connecting it one way at first but didn't work - Wires don't rotate sometimes fix that	- The pizza box isn't noticeable - Hint made sense - Add sound

UI Before Feedback (GIF recorded with [Chrome Capture](#))

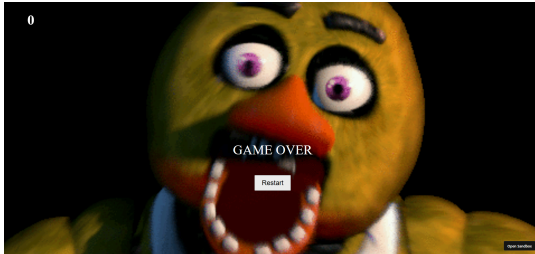

What trends did you identify in your feedback?

- Left before finishing the puzzle
- Confused trying to get around
- Change the jumpscare gif
- The pizza box isn't noticeable
- Add some sound
- Wires don't rotate sometimes fix that
- GET RID OF THE HOVER TO MOVE

UI After Feedback (GIF recorded with [Chrome Capture](#))

What changes did you make to improve your puzzle UI?

- Exit button only appears after key is collected
- Made the layouts a little more linear
- Changed the jumpscare gif
- Changed the pizza box to a more noticeable key
- Added some sound
- Fixed the wire rotation bug as well as some others
- Got rid of the hover to move
